

News Release

25th June 2020

Update on the patent infringement lawsuit:

SEMICAPS Pte Ltd v. Hamamatsu Corporation et al

On 23rd April 2020, Judge Donna Ryu issued a Claim Construction Order on the construction (i.e. definition) of 3 terms in the US Patent 7,623,982. She agreed with SEMICAPS that the 3 terms, %value+, %another value+ and %test result+ require no construction and should be given their plain and ordinary meanings.

For the full order, please refer to:

About SEMICAPS

SEMICAPS is the world's most technologically advanced company in the field of failure localization analysis in semiconductors. Used by leading companies like GlobalFoundries, AMD and Intel for their design-debug and yield analyses, the SEMICAPS laser probe microscope is capable for semiconductor technology nodes as small as 10 nm. Further, besides the standard laboratory configurations, the SEMICAPS Wafer Probing platform, the SEMICAPS 5000, allows semiconductor wafer of complex logic chips to be analysed without the need for sorting, dicing and packaging. This saves weeks for foundries undergoing their yield enhancement cycle.

SEMICAPS founded in 1988, is a technology spinoff from the National University of Singapore.
