

SEMICAPS ARSIL

APLANATIC REFRACTIVE SOLID IMMERSION LENS

FULL PITCH RESOLUTION < 150 nm

Intel 14 nm Skylake
Xeon E3 1220 v5

Backside 1064 nm
laser image

~ 80 nm lines and
~ 160 nm pitch

Features

- The smallest laser spot size on the DUT which gives the best return signal with the lowest noise and lowest cross-talk, used in 3 nm and 5 nm process
- 3.3 NA (<150 nm resolution pitch)
- Best sensitivity and able to run devices at high speed/power
- SIL option for full backside thickness (750 micron) available
- Easy sample prep 50 - 100 μm , customizable

Patented SIL Assembly Design
